Power Distributor & Control Box
English

Warranty conditions

Material and construction defects are covered by a 2-year manufacturer's warranty. The product must be delivered for warranty including all parts and the original proof of purchase showing the date of purchase. A product with incomplete parts or missing proof of purchase will not be considered for warranty! The device will be inspected upon receipt and a decision will then be made as to whether it will be repaired or replaced.

For a device that has been repaired or replaced under warranty, the remaining time of the original warranty period applies. Carefully read the instructions relating to installation, use and maintenance. Damage due to improper use, contamination or lack of cleaning of the appliance, glass breakage and damage to the cord and screen, are not covered by warranty.

Keep the proof of purchase at all times, no warranty claims can be made in the absence of the proof of purchase!

Symbolism and terms

Warning symbols and/or signal words

The warning symbols and/or signal words below are covered in this manual:

Danger imminent due to electric shock

Its meaning is that there is a danger due to electric shock. This could lead to serious or fatal injury and/or serious damage to the appliance or environment if safety instructions are not followed.

Risk situation due to UV-C radiation

The significance of this is a risky situation due to UV-C radiation. If the safety instructions are not followed, the possible consequence is serious eye injury and/or skin damage.

Warning

The significance of this is a risky situation. Failure to follow the safety instructions may result in average or light bodily injury and/or damage to the appliance or its surroundings.

Recycling

The appliance must not be disposed of together with normal household waste. It should be disposed of at an official collection point, such as the Environmental Centre, or at the point of sale when purchasing a new similar product. It is advisable to follow the rules applicable in your country regarding the separation of electrical and electronic products/waste. Separate collection and recycling is better for the environment, public health and helps reduce waste.

EU norms

This device complies with current EU standards.

Note!

Its meaning is; caution, relevant information or advice/tips.

This is a reference to the relevant illustration ... on page of this manual.

Control Box & Power Distributor

Technische tekening 000000-Power-Distributor met Control Box

Illustration 1

Note!

Watch out! **3B** may only be connected to **1D** of the Control Box!

Connect the Power Distributor to the Control Box of Filtreau Excellent drum filters:

See illustration 1

1. To operate the Power Distributor, insert plug **(3B)** into the pump socket **(1D)** of the Control Box. (NOTE! this must not be plugged into any other socket on the Control Box) Then plug the power plug **(3A)** into the socket.
2. The cabinet has 4 additional sockets to which pond pumps and UVC units may be connected.
3. If the control box dry-running protection is disabled, it restarts after 30 seconds. The Power Distributor now also switches back on.
4. When the flush protection activates, the Control Box enters fault mode after 5 minutes. It has to be reset manually using the On/Off button on the Control Box **(1A)**. After resetting, the Power Distributor switches on again.
5. As soon as the filter cover is removed, the Control Box switches off (magnetic protection). See manual: filters, illustration 5 **(1H)**. After replacing the cover, the Power Distributor switches on again.

Safety first

Before using/installing the system, read the entire manual carefully! If in doubt, always consult a recognised installer.
